- JavaScript / ReactJS / VueJS
- DOM manipulation
- UX/UI Assessment

- Responsive web design
- Cross-browser compatibility
- Debugging / troubleshooting skills
- Version control (Git)
- SCRUM and Agile Methodology

Career Summary

January 2022 – Present

Setly Romania (Sibiu)
Junior Front-End Developer (Vue JS)

- Worked as a key member of the development team responsible for the firm's accounting app using Vue JS to build modern and responsive user interfaces.
- Collaborated closely with cross-functional teams, including product management and design teams, to ensure a seamless user experience and efficient codebase.
- Leveraged strong problem-solving skills to help identify and resolve bugs and usability issues in the application, ultimately resulting in a more polished and functional product for users.

July 2021 – October 2021

Accesa (Cluj-Napoca)
Junior ServiceNow Developer (JavaScript)

- Gained practical experience as a junior ServiceNow developer, working on a variety of projects and learning how IT operations work in a corporate environment.
- Collaborated with senior developers and project managers to understand requirements, provide updates, and contribute to the development of custom ServiceNow solutions.
- Further developed my skills in JavaScript, which I had learned previously through personal projects and self-study, to enhance and customize the ServiceNow platform.

January 2021 – July 2021

Freelance (Remote)
Junior Front-End Developer

- Developed websites using HTML, CSS, and JavaScript, learning how to create responsive layouts and interactive elements for clients with a variety of needs.
- Built web applications using ReactJS, including implementing components, handling state, and working with APIs to fetch and display data.
- Collaborated with clients to determine project requirements, provided regular updates and incorporated feedback to deliver quality work on schedule.

Education

- FastTrack IT - Qualification: Analist Programator (11/2019 - 06/2020)
  - During my time at FastTrack IT as an Analyst Programmer (11/2019 - 06/2020), I completed a comprehensive web development course where I gained a solid foundation in programming and web development concepts including HTML, CSS, JS, ReactJS, and MySQL. This experience fuelled my passion for programming and sparked a desire to continually learn and enhance my skills to become a proficient developer

- Economy of Commerce, Tourism and Services - University of Bábes Bolyai, FSEGA (2017 - 2020)
  - I pursued a degree in Economy of Commerce, Tourism and Services from the prestigious University of Bábes Bolyai, FSEGA, from 2017 to 2020. During this time, I honed valuable skills in decision-making, business acumen, and effective communication with clients. These skills have been instrumental in shaping my approach to work and have enabled me to deliver quality results consistently.

Projects

- Portfolio website (Solo project, HTML, CSS, JavaScript)
  - I designed and developed a professional portfolio website using HTML, CSS, and JavaScript as a solo project. The website showcases my skills and experience, while providing information about my professional background and accomplishments.

- Ecommerce Store (Solo project, React, HTML, CSS, JavaScript)
  - I developed an ecommerce store from scratch using React, HTML, CSS, and JavaScript. The project involved designing a user-friendly interface for browsing and purchasing products, implementing cart functionality for adding and removing items, and integrating secure checkout features.

- Weather App (Solo project, HTML, CSS, JavaScript)
  - This is a solo project I worked on that involved utilizing HTML, CSS, and JavaScript to develop a weather application. The app is capable of automatically detecting the user's location and displaying the current temperature, humidity, wind speed, and a brief weather description. Additionally, the background image of the application changes in accordance with the user's current location.

- Social Media Replica UI (Solo project, React, HTML, CSS, JavaScript)
  - This solo project, developed using React, HTML, CSS, and JavaScript, showcases my expertise in UI design by presenting a social media replica UI inspired by Facebook.

Languages

- English: Advanced (C1)

- Romanian: Native (C2)
